UTAH STATE UNIVERSITY'S CEREMONIAL MACE

The top of the mace depicts a flame of crystal tinted with Aggie blue and modeled after the "lamp of learning," the classical symbol of knowledge and freedom. Imbedded within it is a brushed copper disk emblazoned with the University's seal.

The copper bezel below this crystal has 13 sunstones set into it. These symbolize the 13 presidents who guided the institution through its first century.

The white oak shaft comes from wood that was originally part of the banisters of Old Main and rescued from the building after the fire of 1983.

The base consists of limestone provided by the Church of Jesus Christ of Latter-day Saints and taken from the same quarry that was used to build the Logan Temple.

Thus, the mace represents the essence of our land-grant institution: seated in the bedrock of our community, striving and growing ever higher, crowned by the light of learning.

A BRIEF HISTORY OF MACES

Macers have long been part of academic heraldry, though their function was not always ceremonial. Originally weapons of war, maces are featured often in ancient Egyptian art where kings are shown ritually smiting their foes. This original function has not been entirely lost. Campus officials in the Middle Ages more than once kept students in line by employing their university's mace in a manner recalling its primitive function. Even in the modern age, it is not unknown for a university mace to be used in this way. For instance, during the commencement ceremonies at Cornell in 1973, when a professor of medieval studies who was carrying the university's mace in a procession was confronted by protesters, he wielded his academic training and the mace in its original fashion.

But university maces today are, for the most part, treated as decorative emblems symbolizing the institution's authority. Seen most often at commencement and other solemn occasions, they remind those in attendance of the deep traditions inherent in a student's journey through university studies. Like the word for the ceremony itself, "commencement,"—which admonishes its participants to remember that this is a celebration of beginnings, not endings—the mace turns the eye forward to the life to come by recalling the rich academic heritage of higher learning and the promise of attainment that comes through education and self-betterment. Our mace, thus, combines elements of both the old and the new, traditional features like gems and stone enhanced with modern designs such as arcs of faceted crystal. Both an impressive work of art and a hallmark of the university's history, this mace brings to light everything that is best about Utah State University.

ACADEMIC HERALDRY

The history of academic heraldry reaches back into the early days of the university. A statute of 1321 required that all "Doctors, Licentiates and Bachelors" of the University of Coimbra wear gowns. In England, in the fourteenth century, the statutes of certain colleges forbade "excess in apparel" and prescribed the wearing of a long gown, necessary, no doubt, for warmth in the unheated buildings frequented by medieval scholars. Hoods were used to cover the head until replaced by the skull cap and later academic caps. Both Cambridge and Oxford have made academic dress a matter of university control down to the most minor detail; and in Oxford during the seventeenth century any tailor who changed the authorized design "even by a nail's breadth" was punished by the vice-chancellor of the university. When American colleges and universities decided to adopt some suitable system of academic apparel, it seemed best to agree on one that all might follow. Accordingly, there was held on May 16, 1895, at Columbia University, a conference of representatives of the boards of various interested institutions. From that meeting came a code of academic dress for the colleges and universities of the United States, which most institutions of higher learning have adopted.

GOWNS

The academic gown for the bachelor's degree has pointed sleeves and is designed to be worn closed. The gown for the master's degree has an oblong sleeve, open at the wrist. The sleeve base hangs down in the traditional manner. The rear part of its oblong shape is square cut, and the front part has an arc cut away. It is designed this way so that it can be worn open or closed. The gown for the doctoral degree has bell-shaped sleeves and may be worn open or closed.

COLORS

For all academic purposes, including trimmings of doctoral gowns, edging of hoods and tassels of caps, the colors associated with the different academic disciplines are as follows:

Agriculture, *Maize*
Arts, *Brown*
Business, *Drab*
Education and Human Services, *Light Blue*
Engineering, *Orange*
Humanities and Social Sciences, *White*
Natural Resources, *Russet*
Science, *Gold-Yellow*
School of Graduate Studies, *Black*

The white ribbon with the Greek key on the robe of a graduate identifies an inductee into Phi Kappa Phi, the National Scholastic Society. Those wearing gray collars and a medallion are Mortar Board Senior Honor Society members. A gold braided cord draped over the cowl distinguishes a graduate of Honors.

HOODS

Academic hoods are worn by recipients of advanced degrees. The master's degree hoods are three-and-one-half feet in length and are lined with the official color or colors of the college or university conferring the degree, which at Utah State University are navy blue and white, displayed in a heraldic chevron. The doctoral hood consists of a larger and longer assemblage of institutional color draped over the recipient's shoulders and falling well down the back. The binding or edging of the hoods is of velvet or velveteen, three inches wide for the master's degree and five inches wide for the doctoral degree.

CAPS

Academic caps come in two forms: the traditional mortarboard (from Oxford) or square cap; and a soft cap that resembles an oversized beret (from Cambridge). The mortarboard used by Utah State University is worn with a tassel. Black tassels designate the graduate's major field of learning, and gold tassels indicate doctors and the governing officials of institutions.

ACADEMIC PROCESSION

The commencement procession originates at the University Quad and the line of march proceeds to the Dee Glen Smith Spectrum. The procession is composed of three divisions: (1) color guard, University President, Regents and the Board of Trustees, administrative officers and special guests; (2) the faculty; and (3) candidates for degrees. The procession stops at the tunnel entrance to the Spectrum, the first two divisions dividing so that the candidates for graduation pass between them and enter the hall first.

A MESSAGE FROM PRESIDENT

Stan L. Albrecht

Congratulations, graduates, on the many things you have accomplished to reach this special occasion. Today, you both complete an important life journey and embark on another. For some, that will mean beginning a new career; for others it will mean continuing graduate or professional school training. I wish you great success in whatever comes next and trust that your experience at Utah State University has prepared you well for what is ahead.

You graduate today from one of America's fine universities, one that has achieved balance among the three "pillars" of the land-grant university system — learning, discovery, and service. Your learning has been enhanced by daily exposure to an outstanding teaching faculty. You have been participants in the discovery process through your involvement with world-class researchers, scholars, and artists from disciplines across the university. You have given much back through your engagement in a broad range of service activities. You are prepared to make the kind of positive impact on your world that proud Aggie graduates before you have made and continue to make.

These commencement ceremonies are, for me, an affirmation of human potential, an affirmation of hope for communities everywhere. A world-class faculty has helped you learn the details of your chosen professions. But in addition to that critically important preparation for your life's work, we hope we have also instilled in you other ideals, as well. I hope we have fanned the fires of caring, of giving, of taking responsibility. I hope we have cultivated passion, adventure, and understanding. You are a different person today than you were four or more years ago when you first walked across the Quad in front of Old Main. We hope you see yourself as a better person as well.

President

COMMENCEMENT SPEAKER & HONORARY DEGREE

Hugh Evans

Hugh Evans is an Australian humanitarian and an internationally renowned development advocate. As the CEO of the Global Poverty Project, Mr. Evans is making a difference to those living in extreme poverty in the developing world.

Mr. Evans's passion for poverty eradication was sparked at the age of 14 while on a World Vision trip in the Philippines. Living with his host family in a Manila slum, he began his journey to end the status quo of extreme poverty.

Following a trip to South Africa in 2002 as World Vision's inaugural youth ambassador, Mr. Evans co-founded the Oaktree Foundation, Australia's first youth-run aid organization. He wanted to bring young people together to end global poverty, and his success as director led Mr. Evans to being named Young Australian of the Year (2004) and Junior Chamber International Person of the World (2005).

Mr. Evans then worked to grow the "Make Poverty History" campaign in Australia, helping to run the 2006 "Make Poverty History Concert" fronted by U2 singer Bono. The 2007 "Make Poverty History Roadtrip" saw campaign images projected onto the sails of the Sydney Opera House. The impact of these campaigns was credited with playing a key role in the Australian government's decision to increase its committed foreign aid budget, resulting in an additional \$4.3 billion per annum invested in the world's poorest people.

In 2008, with grants from the United Nations, Australian and British governments, Mr. Evans impacted the aid and development sector, co-founding the Global Poverty Project (GPP). GPP is an education and advocacy organization committed to increasing the number and effectiveness of individuals taking action to end extreme poverty. GPP launched in Australia in 2009 and has expanded to New Zealand, the United Kingdom, the United States and Canada.

In August 2012 the Global Poverty Project launched the Global Citizen Festival — a free, ticketed charity music event featuring the Black Keys, Foo Fighters and Neil Young where \$1.3 billion in new commitments were made to help end extreme poverty. The Global Citizen Festival was repeated successfully in 2013 resulting in 25 policy and financial commitments towards ending extreme poverty by 2030.

Mr. Evans completed a science/law degree at Melbourne, Australia's, Monash University with First Class Honors. He was the recipient of the Sir John Monash Award and a Chevening scholarship from the British Council, allowing him to earn a master's in international relations at the University of Cambridge in the United Kingdom.

For his vast humanitarian efforts to end world poverty, Utah State University is proud to bestow upon Hugh Evans the honorary degree, Doctor of Humane Letters.

HONORARY DEGREE

Tayseer Al-Smadi

Tayseer Al-Smadi is a Utah State University alum who has enjoyed a noteworthy career in the Hashemite Kingdom of Jordan. His expertise in designing, implementing, monitoring and evaluating socioeconomic plans has led to success in both the public and private sectors.

Dr. Al-Smadi is currently a senator of the Hashemite Kingdom of Jordan where he serves as chair of the Senate Public Services Committee. Additionally, in February 2014, he was elected chairman of the Jordan Press and Publishing Corporation.

Prior to becoming senator, Dr. Al-Smadi spent 19 years in public service with the government of Jordan where he contributed to the development of many programs and initiatives aiming to improve the standard of living as well as the country's economy. In 2004, Dr. Al-Smadi was responsible for guiding and facilitating the process for preparing the first "Jordan Poverty Assessment Report" that was prepared in collaboration with the World Bank. He was also appointed to several public service roles related to improving lives in Jordan, including Minister of Planning and International Cooperation and Minister of Agriculture as well as serving on the board of trustees for the Jordan Hashemite Fund for Human Development and on the Education Board for the Hashemite Kingdom of Jordan.

After graduating with a bachelor's in economics from Yarmouk University in Jordan, Dr. Al-Smadi began his career with the

Central Bank of Jordan. Continuing with his employment, he went on to pursue a master's in economics from the University of Jordan and then received a scholarship from the Central Bank of Jordan to attend Utah State University where he would earn a doctorate in economics with an emphasis in international trade and economic development. Dr. Al-Smadi was actively involved in student life during his time at USU, where he served as president of the Arab Student Association and was named USU International Student of the Year in 1997.

After finishing his USU studies, Dr. Al-Smadi returned to Jordan to work as a senior researcher at the Central Bank of Jordan. During this time he also worked as an adjunct lecturer at the Economics Department in University of Jordan where he taught courses in international trade, economic development and econometrics.

After several years in the public sector, Dr. Al-Smadi stepped away from government service to establish a consulting firm, Al-Shamal Consulting, in 2009, where he served as CEO.

Dr. Al-Smadi is married to Heba Rasas and has four children; three sons and one daughter.

For his dedication to improve the lives of the Jordanian nation, Utah State University is proud to bestow upon Tayseer Al-Smadi the honorary degree, Doctor of Humane Letters.

HONORARY DEGREE

Pamela J. Atkinson

Pamela J. Atkinson is an advocate for the impoverished, underprivileged and homeless populations in Utah and has served on countless boards and organizations dedicated to caring for Utah's underserved.

Working directly with homeless families, individuals, refugees and low-income people, Ms. Atkinson believes that one should never underestimate the powerful impact of giving. She, herself, has made a tremendous contribution to address the homeless and hungry in Utah and works to help house, clothe, feed and provide healthcare and counseling services for them.

Ms. Atkinson was instrumental in initiating a number of clinics in Salt Lake City, Utah, area schools that provide health care for students and their families. The Lincoln Family Health Center, the Intermountain Neighborhood Clinic and the Rose Park Family Health Center were established to provide preventative and primary medical care in lower-income areas as Ms. Atkinson believes that children who are ill experience difficulty in learning.

As an advisor on policy, planning and strategy for Utah Governor Gary R. Herbert, Ms. Atkinson works to create private and public partnerships to help prevent and solve many of Utah's societal problems. Throughout the year, she advocates at the Utah legislature for a variety of issues, including touting the benefits of education as a way to prevent intergenerational poverty.

Ms. Atkinson has served the state of Utah in a variety of appointments, including serving ten years as a member of the State Board of Regents as well as with the State Board of Education and the Utah College of Applied Technology Board. She now serves on the State Homeless Coordinating Committee, Envision Utah, BMW Bank of North America Board, and the Alliance for Unity Board. She is also chairwoman of the Utah Coalition Against Pornography and is part of the *Deseret News's* Editorial Advisory Board.

Throughout her career Ms. Atkinson held several positions in the health care field. Before retiring, she served as the vice-president of Mission Services with Intermountain Health Care where she worked to create many partnerships between Intermountain and local community organizations to improve overall health in the state of Utah.

Ms. Atkinson received her basic education in England and then moved to the United States to earn a bachelor's from the University of California, and a master's from the University of Washington.

For her tremendous contribution to care for Utah's underserved, Utah State University is proud to bestow upon Pamela J. Atkinson the honorary degree, Doctor of Humane Letters.

HONORARY DEGREE

R. Gilbert Moore

R. Gilbert Moore has been a pioneer in rocketry and propulsion science since the early days of his career as a rocket scientist at the national White Sands Proving Ground in New Mexico.

After leaving the White Sands Proving Ground, Mr. Moore moved to Utah to work for the Thiokol Corporation where he began working on rocket launches and satellite experiments. During his 25 years with Thiokol, Mr. Moore would contribute to the launch of several hundred sounding rockets and six satellite experiments from sites around the world. Near the end of his time at Thiokol, Mr. Moore was named the Wasatch Division's director of external affairs where he represented the corporation during the Space Shuttle Challenger accident investigation.

Mr. Moore joined Utah State University's Space Dynamics Laboratory in July 1989 as a senior research scientist. He also continued to serve as an adjunct professor in USU's Physics Department, a position he had held since 1976. Mr. Moore's role as a professor led him to become interested in helping students by searching for opportunities to expand their intellect in the area of science and engineering. He single-handedly founded USU's Get Away Special program, a nationally and internationally regarded program that sent 33 student-built micro-gravity experiments into space. In addition, Mr. Moore co-founded the annual Small Satellite Conference held at USU and attended by space industry experts from around the world

and served as director for the Rocky Mountain NASA Space Grant Consortium.

In late 1994, Mr. Moore retired from the Space Dynamics Laboratory and joined the Astronautics Department of the United States Air Force Academy as the first occupant of the General Bernard A. Schriever Chair in Space Systems Engineering. Since retiring from that position, Mr. Moore continues to be active with USU working most recently on the September 2013 launch of a SpaceX Falcon 9 rocket. The rocket carried a set of three USU Get Away Special satellites that will provide educational opportunities for USU students over the next ten years.

Throughout his career Mr. Moore has served both the science and technology communities as an advocate and board member on various committees, including the state of Utah's Advisory Council on Science and Technology; the Hansen Planetarium and the USU Research Foundation.

Mr. Moore earned a bachelor's in chemical engineering, with honors, from New Mexico State University and pursued graduate studies in physics at that institution.

For his many years of inspiring young minds in the area of space science and education, Utah State University is proud to bestow upon R. Gilbert Moore the honorary degree, Doctor of Physics.

D. WYNNE THORNE CAREER RESEARCH AWARD

James P. Evans

Since coming to Utah State University's Department of Geology in 1987, James P. Evans has embodied a collaborative, multi-disciplinary approach to problems with real-world significance and societal impact.

With his research focusing on structural geology, Dr. Evans studies how the Earth's outer layers deform in response to stress. His current work focuses on four areas; fault-related rocks and fault zones, fluid-flow associated with faults, CO₂ sequestration, and rock fracture in sandstone. These research areas are important for understanding and reducing the hazards of earthquakes, as well as advancing the efficiency and safety of methods to store industrial by-products.

Dr. Evans has published more than 60 peer-reviewed articles and generated nearly \$4 million in research funding at USU, a very high level for study in the earth sciences. He is active and well regarded in the geologic community; he is a Fellow of the Geological Society of America, served as chief editor of the *Journal of Structural Geology* and was a founding co-editor of *Lithosphere*, both international peer-reviewed journals. In 2013, he received the American Association of Petroleum Geologists Foundation's Professorial Award.

During his time at USU, Dr. Evans has received many university accolades, including Teacher of the Year and Researcher of the Year for the College of Science and USU Graduate Mentor of the Year. He reached these research accomplishments while also engaging in high levels of teaching, mentoring and service activities. He has mentored 41 graduate and 20 undergraduate student researchers. His mentoring efforts continue beyond graduation, as he helps students find positions and careers that match their interests and maintains contact with them after they move on.

Dr. Evans has also taken on the role of development director helping to create several new student scholarships and secure funding for major research equipment for the Department of Geology.

The research of Dr. Evans is extraordinarily valuable to Utah State University because it addresses scientific and societal issues vital to both environmental and economic concerns, and because he includes students at every level of research. He is well deserving of the 2014 D. Wynne Thorne Career Research Award.

ELDON J. GARDNER TEACHING AWARD

David E. Brown

Falling asleep in one of Dave Brown's math classes is not an option. Not because Dr. Brown is an unyielding taskmaster, but because his lectures are, as his students describe it, "electrifying."

"When I entered Utah State University, I hated mathematics," said student Ian Parrish, president of USU's chapter of the American Mathematical Society. "But it was Dr. Brown's class that completely changed my perspective. He brings his passion to the classroom every day."

Dr. Brown, who joined the faculty of USU's Department of Mathematics and Statistics in 2004, lists his teaching objectives with two simple statements: 1) affect the lives of many people positively and 2) never stop learning and improving.

"One of these objectives is conceited; the other is arrogant," said Dr. Brown, who earned a doctorate in applied mathematics from the University of Colorado at Denver. "What right do I have to think I can have an effect on people's lives? Yet, I think I can actually do it. And the reason I can do it is I am always ready and excited to tell anyone about math."

The two objectives, he said, inspire him to continually "prepare, prepare, prepare, study, study, study" and think deeply about how to best explain a complicated concept.

USU math professor Jim Cangelosi describes his colleague's class sessions as "joyous events for students" – how often is that description used to describe mathematics teaching? "Lecture," Dr. Cangelosi said, "doesn't quite capture how Dr. Brown communicates with his students."

"Rather, he leads them in a naturalistic conversation in which they collaboratively address problems," he said.

Many praise Dr. Brown for resurrecting USU's long dormant American Mathematical Society student chapter, which, they note, opens doors of opportunity for students.

"Dr. Brown urged me to pursue opportunities such as attending and presenting at conferences and applying for research programs that, without his encouragement, I would not have had the confidence to pursue," says recent USU graduate Sarah Mousley, a 2012 Goldwater Scholar and current doctoral student at the University of Illinois at Urbana-Champaign. "He encourages his students to get involved in the meaningful research and he consistently demonstrates that his students are his top priority."

E. G. PETERSON EXTENSION AWARD

Ralph E. Whitesides

Ralph Whitesides has worked for Utah State University Extension in various capacities since 1987. Initially hired as Extension agronomist, Dr. Whitesides is now an Extension weed specialist.

Dr. Whitesides is a respected educator and many USU Extension county faculty and specialists have observed him in the classroom to learn from his expertise. He has the unique ability to create a warm classroom environment where people feel safe exploring agronomic and weed science topics and is able to blend scientific topics with his broad life experience. Dr. Whitesides has also assisted in administrative roles spending time serving as associate dean for Extension and Academic Programs.

Using his broad expertise of western agriculture, Dr. Whitesides has written and co-written many publications and educational materials benefitting USU Extension and its clientele. The publications are diverse and cover a wide array of topics. However, if one were to evaluate Dr. Whitesides solely on the traditional Extension metrics of publications, presentations and meetings

planned, one would miss the primary strength he brings to USU Extension — working with people. Dr. Whitesides makes it his mission to work closely with the people he meets and to help them solve their issues and answer their questions.

Dr. Whitesides grew up on a family farm in Layton, Utah, that is nowland occupied, in part, by Layton Hills Mall. He attended USU, earning a bachelor's in agronomy. He began his career working at U&I Sugar Company in Prosser, Washington, for one year and then went to Oregon State University where he earned master's and doctorate degrees in weed science. Dr. Whitesides first academic job was as Extension weed scientist at Oregon State University. He then worked at Washington State University for six years before returning to USU in his role as an Extension specialist.

After spending most of his professional career with USU Extension, Dr. Whitesides is a well-respected member of the USU Extension family. For his caring and outstanding work representing USU Extension around the state, he is awarded the E.G. Peterson Extension Award for 2014.

OUTSTANDING GRADUATE MENTOR AWARD

Evelyn L. Funda

In her nearly 20 years at Utah State University, Evelyn Funda, associate professor of English, has created an environment of cultivation, demystification and engagement that allows graduate students to explore, gain confidence and grow as scholars.

Dr. Funda has served on more than 60 master's or doctorate supervisory committees and has directed 19 students in master's level teaching internships. She has also taught six graduate courses at USU, including American Lit and Culture: The American Farm, that incorporated non-traditional materials with more canonical texts, to create a variety of readings and lively class discussion. Dr. Funda has co-authored three essays with current or former graduates and has a fourth in the works.

In the Department of English, Dr. Funda initiated a service role of graduate professional development coordinator to offer workshops and publish an online newsletter on practical career skills, with topics including writing an effective curriculum vitae, submitting successful doctorate applications, tips for publishing and behavior at professional conferences. During her service on the executive council of the Western Literature Association, in addition to her assigned duties, Dr. Funda focused on graduate student issues by creating special conference sessions and networking luncheons for graduate student attendees. In the

association, she also served as a judge for multiple graduate student awards and as a speaker for professional panels.

In her current appointment as director of graduate studies in the Department of English, Dr. Funda advises approximately 100 graduate students in five programs and conducts all administrative responsibilities for graduate students and instructors. In this role, she has continued to make significant improvements in communicating with graduate students in the department. Her efforts include an informational blog, brown-bag lunch series and published calendar. She populates those events and media with information about programs, the application and degree completion process and professional advice.

Dr. Funda's students have gone on to excel in their professional careers, with dozens presenting class-originated papers at regional conferences, serving on Western Literature Association councils or receiving association awards, publishing books and other works. Those students have described her as engaging, intellectually adventurous and empathetic, and have credited her with helping them become mentors in their own rights. Dr. Funda is well deserving of the 2014 Graduate Mentor of the Year Award.

TEACHING EXCELLENCE AWARDS

Through an extensive selection process involving both students and faculty in the various academic colleges, eight members of the faculty have been designated for special recognition for excellence in teaching representing the eight colleges of the University: Agriculture and Applied Sciences; Caine College of the Arts; Jon M. Huntsman School of Business; Emma Eccles Jones College of Education and Human Services; Engineering; Humanities and Social Sciences; S. J. & Jessie E. Quinney College of Natural Resources; and Science. From the eight colleges, The Eldon J. Gardner Teaching Award recipient is chosen; the seven remaining follow:

College of Agriculture and Applied Sciences

LINDSEY M. SHIRLEY

Lindsey Shirley, assistant professor of Family and Consumer Sciences Education at Utah State University, has taken her teaching content beyond the university classroom to individuals across the nation and around the world. Whether in Wichita, Kansas or Rome, Italy, she has shared innovations in teaching and learning that have been implemented into secondary and post-secondary classrooms. A graduate of the Iowa State University Family and Consumer Science Education Leadership Academy, Dr. Shirley has enjoyed the honor of serving as a leader for a profession that strives to improve the quality of life for individuals, families and communities.

As a passionate and highly motivated teacher educator, it is Dr. Shirley's goal to inspire and challenge students to think critically and creatively, problem solve and work effectively in a team. Student success and engagement in active learning experiences are important to Dr. Shirley. Since arriving at Utah State University in 2008, she has served as the instructor for a general education course that explores the links between design and sustainability and how clothing is often used to raise awareness about social issues. In teams or as individuals, students design and create clothing that is featured during a university-wide event, a fashion show. This experience has empowered students to confidently share their creations with a large audience while collecting canned food for the Student Nutrition Access Center (SNAC). Since 2009, more than 8,000 individuals have attended the event.

Dr. Shirley's innovative teaching, research, mentoring and advocacy for family and consumer sciences has led to national recognition. In 2011, Dr. Shirley received the Leader Award from the American Association of Family and Consumer Sciences. Her passion for working with students, teaching and family and consumer sciences has led to recent recognition as the Family and Consumer Sciences Education Association's Goodheart-Willcox Publishing Educator of the Year. Along with awards received, Dr. Shirley has enjoyed speaking to audiences ranging from 30 professionals to more than 2,000 teachers in locations in the United States and around the world. Her work can be found in a published book, peer-reviewed journal articles and was recently showcased in an online talk presented by Zappos, Inc. and a fashion incubator, the Stitch Factory.

Caine College of the Arts

KATHLEEN PUZEY

A native of northern Utah, Kathy Puzey's artistic work reflects her deep love of the region's natural beauty and diversity. She currently serves as an associate professor in the Department of Art and Design in the Caine College of the Arts.

A driven worker, as well as a skilled and creative visual artist, Professor Puzey sets a sterling example for her students. Engaging with each learner on an individual level, assessing their abilities and guiding their development as artists, Professor Puzey builds a strong rapport with students, engendering an environment of trust in which risk-taking and experimentation thrive. In the open space of the print studio, collaboration, hard work and cross-fertilization energize student learning.

As the only faculty member in the printmaking area, Professor Puzey attends to such practical matters as maintaining the presses, monitoring safety and ensuring that students have access to the facilities. Thus, for the students, the idea of the "work of art" is expanded to include not only the processes of conception and production of prints, but also the network of responsibilities and dependencies between people and their environment.

In addition to putting in extraordinarily long hours in the studio with students, Professor Puzey also supports them in a number of other ways. She brings notable printmakers from around the world for multi-day visits, organizes print exchanges that connect USU student artists with peers at other institutions and also takes advanced students to the annual national meeting of printmakers. Closer to home, Professor Puzey is the faculty advisor for the student organization of printmakers, and her support for their activities, such as holiday-themed print sales, is legendary in the department.

In the end, however, her greatest quality as a teacher is her excellence as a printmaker that inspires her students to reach for quality in their own work.

Professor Puzey received a master of fine arts in printmaking from the University of Nebraska-Lincoln in 2001.

RANDY T. SIMMONS

Randy T. Simmons' primary role as a teacher has been to help students develop a sense of wonder and discover their own talents at understanding the business of life. He encourages that wonder through social media, movies, novels, Shakespeare plays and the Hebrew Bible as well as discipline-specific articles, books, podcasts and news.

As the Charles G. Koch Professor of Political Economy and director of the Institute of Political Economy in the Department of Economics and Finance at Utah State University, Dr. Simmons offers to his students a unique view of political economy. He was trained in public choice and spent ten years in city government, four of them as mayor. Previously, he was head of the Department of Political Science at USU and received a doctorate from the University of Oregon in 1980.

Dr. Simmons is a Senior Fellow at the Property and Environment Research Center as well as at the Independent Institute. His book, *Beyond Politics: The Roots of Government Failure* (2nd edition, 2012), is a primer on public choice theory and practice. His

2012 co-authored book, *Green vs. Green*, examines how local green activists use green ordinances to stop green energy development—a kind of green government failure. His co-edited book, *Aquanomics: Water Markets and the Environment* (2011), shows how water markets are far superior to government water regulations and controls. His forthcoming book is *Political Ecology*, an analysis of the politics of ecology and the ecology of politics.

SARAH CLARK

Sarah Clark teaches undergraduate courses in literacy assessment and instruction for struggling readers, as well as graduate courses in effective literacy instruction and the supervision of school reading programs.

As an assistant professor in the School of Teacher Education and Leadership in the Emma Eccles Jones College of Education and Human Services, Dr. Clark uses her expertise to involve herself in a variety of research projects designed to inform and enhance her own teaching. For example, she has followed her former students into their first teaching jobs to determine what these teachers need to be effective and how the teacher education program is addressing these needs. Through teaching observations, teacher interviews, literacy knowledge surveys and self-efficacy surveys, Dr. Clark has been able to adjust pre-service coursework to better prepare teachers at the very beginning of their teaching careers.

Based on the large amounts of data collected, Dr. Clark has published her findings in national and international research and practitioner journals, thus influencing teacher education practices locally, nationally and at an international level. She is author of the book *A Comparative Analysis of Elementary Education Teacher Self-Efficacy: Making the Transition from Teacher Training to the First Year of Teaching* (2010).

Dr. Clark holds a bachelor's in elementary education and a master's in language, reading and culture from the University of Arizona. She received a doctorate in curriculum and instruction with an emphasis in the areas of literacy and teacher education from Utah State University.

College of Engineering

OENARDI LAWANTO

Oenardi Lawanto is an assistant professor with the Department of Engineering Education at Utah State University whose research interests include cognition, learning, instruction and online learning.

Currently, Dr. Lawanto works on a National Science Foundation-funded CAREER project to investigate student cognitive and metacognitive activities in engineering design education. He is using the framework of self-regulated thinking to engage undergraduate students from multiple engineering disciplines. In addition, Dr. Lawanto is a co-principal investigator of a National Science Foundation site program that provides undergraduate students in science, technology, engineering or mathematics with intensive experience in engineering education research. Both projects will inform engineering and other STEM disciplines how to develop student expertise in regulating their own learning in design and other technical activities.

Before coming to USU, Dr. Lawanto taught and held several administrative positions at Universitas Surabaya in Indonesia. In addition, he has four years' experience working collaboratively with World Bank Institute, a subsidiary of the World Bank, on efforts to improve the quality of training that was delivered in numerous countries. His years of teaching experience in the area of electrical engineering offered him new perspectives on teaching and learning. He used that experience to develop and deliver numerous workshops on student-centered learning and online-learning-related topics in Indonesia. He brought that expertise with him when he came to USU.

Dr. Lawanto is a member of the American Society for Engineering Education and American Educational Research Association. He is also an invited member of the extended community of the National Academy of Engineering's Center for the Advancement of Scholarship on Engineering Education as well as the Phi Kappa Phi Honor Society.

Dr. Lawanto received a bachelor's from Iowa State University, a master's from the University of Dayton and a doctorate in human resource education from the University of Illinois at Urbana-Champaign.

College of Humanities and Social Sciences

KO-YIN SUNG

Ko-Yin Sung is an assistant professor of Chinese in the Department of Languages, Philosophy and Communication Studies at Utah State University.

A creative and energetic teacher who touches the lives of her students for good — both inside and outside of the classroom — Dr. Sung delights in mentoring students across many levels of language ability. She regularly teaches the beginning Chinese courses as she believes a solid foundation is crucial in language learning. She also works with advanced undergraduates in the Chinese teaching minor program, a program she helped found. She also mentors graduate instructors who are teaching Chinese in the Master of Second Language Teaching program.

Dr. Sung is an expert in second language acquisition issues, particularly those that relate to using technology in the classroom and in teaching Chinese. She recently published a four-textbook series through the University of Peking Press entitled *We Speak Chinese*. She is also an active researcher who has published nine articles in the last three years in such journals as *Language and Communication Quarterly*, *The Journal of Language and Linguistic Studies* and the *International Journal of Multilingualism*.

Students have commented that they enjoy “how interactive” her classes are and that they “appreciate the variety of techniques used,” such as “putting together skits and other things to learn *how* to use the vocabulary and grammar.” Students also appreciate the learning activities she organizes beyond the classroom. For example, each semester she organizes a major event for those learning Chinese, such as the Moon Festival Celebration and the Chinese New Year Show that often has 300 to 400 in attendance.

Dr. Sung started working at USU in 2009 and was chosen as the Department of Languages, Philosophy and Communication Studies Teacher of the Year in 2011.

Dr. Sung received a doctorate in culture, literacy and language from the University of Texas at San Antonio.

DANIEL R. MACNULTY

To better engage students in his wildland animal ecology and identification class, Dan MacNulty took his students out of the classroom and into the field.

"I felt the course should be more experiential," said Dr. MacNulty, who joined the faculty of Utah State University's Department of Wildland Resources in 2011. "I also brought professionals, including wildlife biologists from the Utah Division of Wildlife Resources, into the classroom to interact with students and discuss conservation and management techniques."

His students responded with enthusiasm.

"Dr. MacNulty constantly integrates recent research and real-life examples into course material," said student Kari Norman, an Undergraduate Research Fellow who worked with Dr. MacNulty on a wolf-elk signaling project. "He inspires students to be curious and follow their passions."

Dr. MacNulty considers fostering curiosity, instilling self-confidence and encouraging students to become self-reliant, critical thinkers his primary teaching goals.

"The most important skill undergraduates can develop in our era of rapid change and innovation is how to learn," he said. "Students must learn to ask good questions, communicate effectively, critically analyze sources of information and apply new knowledge in unfamiliar contexts."

A tall order of requirements, but one Dr. MacNulty nurtures in students with enthusiasm and commitment.

As a faculty advisor to USU's student chapter of The Wildlife Society, Dr. MacNulty seeks to involve students in meaningful research and field opportunities.

"Dr. MacNulty is always constructing new ways to engage students and enhance their learning experiences," said undergraduate researcher Natalie Schvaneveldt. "One of his proposals exposed students to his longtime research in Yellowstone National Park, providing several students with once-in-a-lifetime opportunities."

Quinney College of Natural Resources associate dean and colleague Karen Mock said Dr. MacNulty has contributed welcome improvements to his department's curriculum and student learning experiences.

"Dan inherited a decidedly unpopular course and worked very hard to redesign it and develop a field component to accommodate a large group of students," Dr. Mock said. "Because of his efforts, our students are enjoying a more engaging learning experience and are better prepared for future careers in natural resource sciences and management."

ALUMNI ASSOCIATION LETTER

Dear Utah State University Graduate:

Congratulations on your graduation from Utah State University! Your degree is a significant accomplishment representing years of hard work and sacrifice. Your degree will be awarded during the "Commencement" ceremony, which means "beginning." Why do we call the end of your formal schooling the "beginning"? I think it is because the educational process is, and should be, a lifelong proposition.

This also marks the beginning of a new phase in your life – the beginning of a new career, the opportunity to apply what you have learned, or perhaps the beginning of an advanced degree. All of which are new beginnings.

Another important beginning is your lifelong connection to Utah State University. Let it be the commencement of a commitment to a lifetime of continued association with USU.

The Utah State University Alumni Association seeks "to enhance the Utah State University experience through lifelong engagement." I invite you to take full advantage of all Alumni Association benefits. For example, we have initiated two exciting programs: First, is the Alumni Career Service, which will be of benefit to you not only as you look for that first job but through the coming years as well. Second, the Aggie Alumni Network, which is a group of alumni representatives throughout the country who are willing to share their knowledge and expertise about their careers and the companies for which they work, the communities in which they live and their personal experiences as an Aggie since graduation. Going forward efforts are being made to create focused networks, such as legal, business, medical, engineering, and so on all across the country. With your continued involvement in the Alumni Association you will have access to these networks, and likely will have an opportunity to serve future graduates. These are just a few examples of Aggies helping Aggies.

For all of this to work, we must have current contact information for you. Please visit our website at www.usu.edu/alumni and update your information now and each time it changes. We want to hear from you too. Let us know what you think about our new programs. Please give us a call at 1-800-297-ALUM, or stop by the David B. Haight Alumni Center.

As many commencement addresses have emphasized, it is important to serve a cause greater than ourselves. I hope you are inspired to engage as an alumnus. We all have much to offer to the USU community. Please continue your involvement with Utah State and find simple ways to "give back" to your alma mater. Your support will ensure that we can continue to live by the motto of "Stand Up. Get Involved. You're an Aggie!"

Good luck and much success.

Proud to be an Aggie,

Stephen F. Noel
Utah State University Alumni Association President, BA '94.
